

CSC 435 Final Project Peer-review forms

Your name: **Isabella Brennan** Your expected grade for the final project: A

Your team members: **Steve Reitz**

In order to get a grade for the final project, each person must fill this form and submit it along with your project code.

1. Please evaluate your own contribution to the final project?

- a. Significant** (Did significant parts of coding, actively participated, understood the game)
- b. Acceptable (Did some coding, attended parts of the discussion)
- c. Trivial (Did some trivial parts of coding, often absent from team discussions)

2. Please evaluate each of your team member's contributions to the final project (you can also describe his/her performances using your own words). Note it is possible that everyone contributed equally and significantly to the project.

Team member 1: **Steve Reitz**

The role of this team member in finishing the final project is:

- a. Crucial and significant**
- b. Acceptable
- c. Trivial

Comments: **He wrote the shopping cart storage and calling code and the shopping cart viewing code (Mainly ShoppingCart.js). He also contributed to the websites conceptualization.**

3. For each of the team member, please answer the following questions? Yes/No. If no, please provide some details.

Team member 1: Steve Reitz

- a. Did this person actively participate in group-discussions? **Yes/No**
- b. Did this person contribute conceptually to the project development? **Yes/No**
- c. Did this person help you understand the game? **Yes/No**
- d. Did this person write significant amount of code either independent or together with you? **Yes/No**

Comments: We worked well together

4. Please describe your own contribution to the final project? Lists the points you helped solved and features you added, etc. You can also list the points that you and

your team members worked together if the task is not divided. Bullet points are enough!

Comments:

Made the physical layout for the website.

- populated txt.files with produce, found corresponding images**
- created a Common.php to hold all redundant code to be called upon on any page of the website**
- wrote the .HomePage.css file**
- wrote the HomePage.php, About_Us.php, ContactUs.php, HomePage.php, Terms_Conditions.php, and ShippingInfo.php utilizing Common.php.**
- wrote the Grocery.php as well as for Dairy.php, Dry_Foods.php, Frozen.php, Meat_Seafood.php, and Produce.php**
- Used a php loop to run through each product text file and input all the grocery store items and images and buttons for each subsequent page (Dairy.php, Dry_Foods.php, Frozen.php, Meat_Seafood.php, and Produce.php)**
- Used Javascript to create hidden divs for the various categories in each virtual aisle (example in Aisle Deli I made 2 divs for Meats and Seafood) while one div pops up the other hides ... when you click Meats buttons, Seafood hides and vice versa)**
- Wrote the ShoppingCartViewer.php page and the Checkout.php page**
- Wrote the Checkout_Complete.php page which inputs the user input into a txt file called checkout.txt**
- Contributed to the conceptualization of the shopping cart.**
